

Garden Sanctuary:

An Indoor Pool Retreat

Nestled within the garden of a beautiful property, this indoor pool building combines elegance and functionality. The pool, a rectangular design with Roman end steps, is the centrepiece of this tranquil retreat, carefully crafted for year-round enjoyment. Encased in an oak-framed structure with skylights that let natural light stream in, the pool area seamlessly merges with the surrounding landscape.

The Brief

Our clients envisioned a luxurious indoor pool that would serve as an escape, blending into the garden's aesthetic. They requested a classic design with modern touches, ample space for relaxation, and facilities for both swimming and lounging. The oak-framed building complements the property, creating a sense of harmony between the indoor pool retreat and the surrounding garden.

The Pool and Spa Design

The pool is 12m x 4m in size, with a Roman end that provides easy access to the water. Its concrete shell is finished with a stunning mosaic tile design, featuring a rich dark contrast and a captivating star detail at the centre, adding a unique, elegant touch. Polished chrome steps at the deep end offer additional entry points, enhancing functionality.

The coping is limestone, which adds a refined edge around the pool, while the surrounding terrace features tumbled limestone slabs that bring a natural, timeless charm to the space. Together, these materials create a cohesive look that suits the pool's rustic yet sophisticated setting.

This pool house is more than just a swimming area; it's a comprehensive wellness retreat. Alongside the pool, the building houses a hot tub and a dedicated changing room area. There's ample space for steamer chairs and garden furniture, allowing for relaxation and lounging between swims. Every detail has been thoughtfully designed to provide a complete spa-like experience at home.

The Building: Oak Frame and Skylights

The pool house itself is constructed with an oak frame, creating a warm, rustic ambiance. Skylights run the length of the building, flooding the space with natural light, reducing the need for artificial lighting during the day, and connecting the indoors with the garden outside. As night falls, underwater LED lighting and soft ambient lights enhance the elegance of the mosaic tiles, setting a peaceful mood.

Heating and Filtration

To maintain a comfortable temperature year-round, the pool is heated by a high-efficiency gas boiler, ensuring reliable warmth even in the cooler months. This system provides rapid heating on demand, allowing the pool to reach the desired temperature efficiently, which is ideal for year-round use. The gas boiler offers a dependable solution tailored to the needs of an indoor pool, combining comfort with operational efficiency.

The pool's water is maintained at crystal-clear quality with an Aquaspeed filtration system, known for its efficiency and low energy consumption. For lighting, Certikin LED lights illuminate the pool and create a relaxing atmosphere, perfect for evening swims.

Innovative Features

For both convenience and safety, a Certikin Roldeck retractable cover is installed at the deep end. This cover not only retains heat when the pool is not in use but also provides an added layer of safety. A deck feature at the deep end introduces a stylish, modern element, offering additional versatility and enhancing the pool's overall design.

Materials & Features

- **Size:** 12m x 4m, rectangular with Roman end steps
- **Construction:** Concrete pool with a custom mosaic tile finish, featuring a central start detail and contrast dark tile trim
- **Coping:** Limestone, adding durability and a refined finish
- **Terrace:** Tumbled limestone slabs for a timeless, natural look
- **Cover:** Automated Certikin Roldeck retractable cover for convenience, safety and energy efficiency
- **Lighting:** Underwater LED lighting and ambient lights for a relaxing evening ambience
- **Heating:** Gas boiler for year-round comfort.
- **Filtration:** Aquaspeed filtration pump for optimal water quality
- **Additional Features:** Hot tub, changing room, and seating area with steamer chairs and garden furniture
- **Build Time:** 12 months for the complete building project, with 5 months dedicated to the pool construction.

The Result

The final result is a stunning indoor pool retreat that offers a seamless blend of modern luxury and natural charm. The mosaic tiles, contrasting limestone finishes, and elegant oak-framed structure contribute to a refined, tranquil environment where our clients can relax, exercise, and entertain guests in style. This indoor pool space truly embodies the concept of a private sanctuary, offering a year-round escape just steps away from the home.

The adjacent hot tub, spacious changing area, and seating make this pool house a versatile space for wellness, adding another layer of luxury to this thoughtfully designed project. The clients were thrilled with the outcome, remarking on the peaceful atmosphere and attention to detail that transformed their vision into reality.
